### Active and wireless

#### For the enjoyment of music and films

The compact and chic Smart Sub 8 active subwoofer provides the bass foundation within the Canton Smart family and, if desired, also beyond: The cube-shaped down-firing subwoofer can be easily connected wirelessly to all products of the Smart series. Connected via cable, it also brings out its low-frequency talents with other speakers. In combination with the high-performance 8-inch chassis, the 200 watt digital power amplifier ensures deep and powerful bass for music and film playback. For example, it can amplify the bass foundation of the Smart Soundbar 9 or Smart Soundbar 10 - for even more intense goose bumps.

## Audio and video

Not only hearing hi-fi and cinema but also feeling it makes the listening pleasure really alive. Our subwoofer Smart Sub 8 helps you to experience your music and movies in a new way. The low frequency range and dynamics it generates from its compact housing are truly amazing. The wireless subwoofer makes it possible to create a stunning sound in your own four walls, and all this in a very living room-friendly size. And it looks stunningly good: the silver or black lacquered cabinet is crowned with a polished and tempered glass surface, which makes the subwoofer an elegant furnishing object.

## Dreampartner

The Smart Sub 8 is the ideal partner for all our Smart speakers. Simply connect to the speakers via radio and the listening fun can begin. You can set the desired volume, the correct phase and the appropriate channel level using a Smart product such as the Smart Soundbar 10. Thanks to the downfire arrangement of the 220 millimetre bass driver, the subwoofer evenly floods the entire listening room with bass waves. Thanks to Canton's own SC technology, the Smart Sub 8 generates enormously deep bass - and that with incredible level stability. The Smart Sub 8 makes it easy for you and switches on automatically as soon as an audio signal is present and switches off again as soon as the movie pleasure has ended.

# CANTON

Type	Active subwoofer system
