## POWER SUB 12 S2

The Power Sub 12 S2 is a superbly equipped active subwoofer that can be used universally for a wide variety of speakers. Its 380 watt active module is optimally equipped and drives the 308 mm Aluminium Titanium Black chassis to top performance. The front-firing woofer finds an ideal partner in the passive radiator of the same size, which is built into the bottom of the cabinet. The result: pitch-black bass with sharp contours and enormous pressure for a particularly impressive stereo and multi-channel music experience.

## TECHNICAL DATA

Type	Subwoofer	
Principle	Bass reflex with passive membrane	
Active driver radiation direction	Frontfire	
Radiation direction Resonator	Downfire
